

# Safety Platform Systems

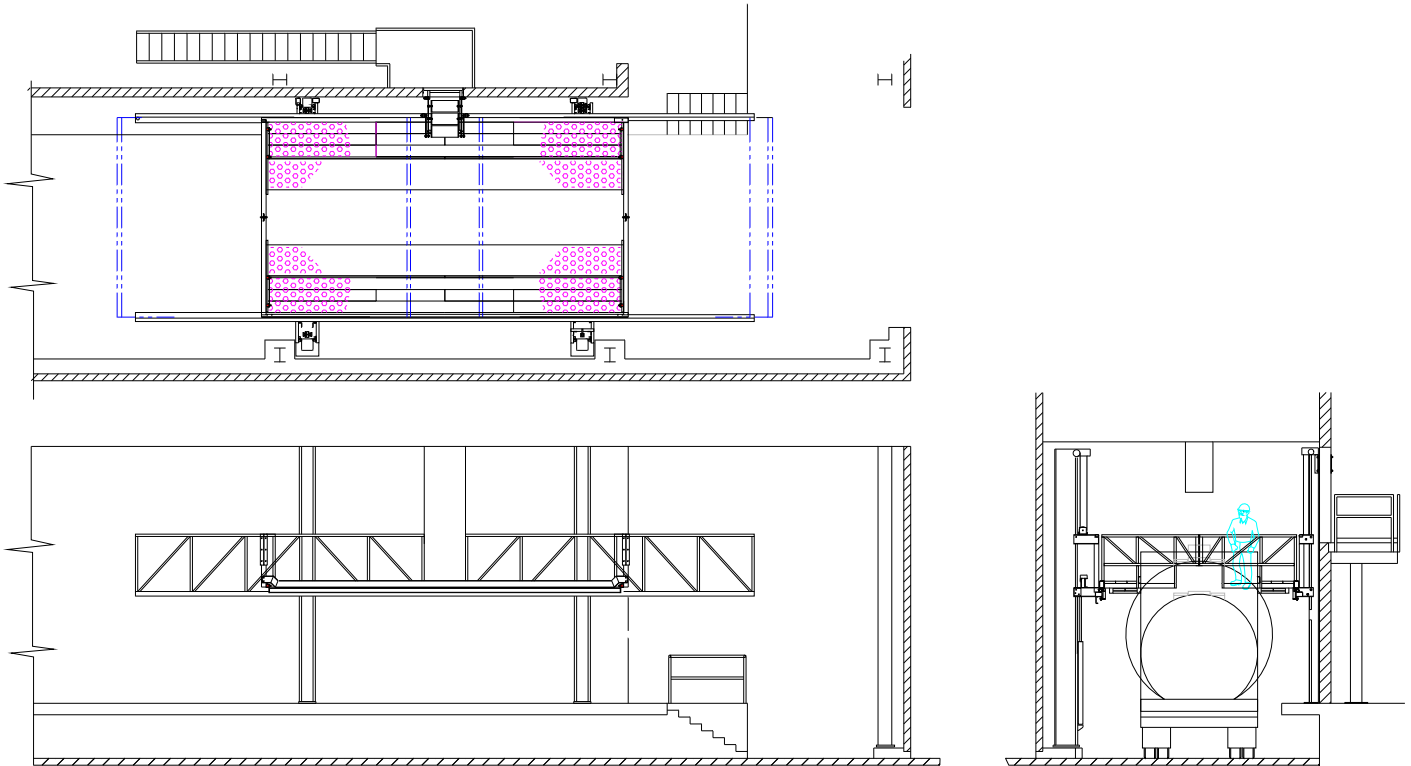

## Custom Vertical Lift Platform - PM-VL-26-C

This system was designed to accommodate railcars of different configurations as well as tank trucks of various heights and lengths.

The platform is 26'-0" long x 14'-6" wide with an opening down the center of 4'-0" width which can be adjusted hydraulically to 8'-0" width.

This platform has a vertical travel of 6'-0" and a horizontal travel along the centerline of the loading facility for a distance of 10'-6" each side.

This unit allows the operator full access to the various railcar and trucks being used, while providing a safe and secure working environment.
